Conditional Reasoning Test of Aggression

Name: John Smith

Admin ID: A1716119

Date: 3/22/2002 2:52:58 PM

Tester ID: T6634183

	Raw Score	Rating:
Aggression	5	Average

3-7 is an Average Aggression score. People who score in this range have the second highest probability of engaging in aggressive or delinquent behavior.

	Raw Score
Improper Responses	0

(Improper Responses=Illogical Answers + Unanswered Questions)

If the test taker had 5 or more Improper Responses, then he or she had a reading problem or did not take the test seriously. As a result, the Aggression Score should not be interpreted and will not be reported.

Notice: The interpretive information obtained from this or any other test should be viewed as only one source of information about the individual being evaluated. Results should be verified through other means, and the information obtained should be integrated with all other sources of information. An independent decision should be made based upon all criteria and information. Neither Innovative Assessment Technology, LLC nor anyone on its behalf warrants the performance or results that may be obtained by using this test.
